DETAILED ACTION

Election/Restrictions

1. This application contains claims directed to the following patentably distinct species of the claimed invention:

Group 1, claims 1-5 are drawn to a non-volatile cell structure having a plurality of MOS transistors..., a shared coupled capacitor structure coupled between transistors of adjacent bit line from second doped electrodes, wherein the shared coupled capacitor comprises at least two floating-gate MOS capacitors, each capacitor having first and second S/D regions,..., ***and the second S/D region is shared with an adjacent one of the floating gate transistor;***

Group 2, claims 6-12 are drawn to a nonvolatile memory cell comprising a MOS transistor, a floating-gate MOS transistor having first S/D region coupled to second doped electrode, ***second S/D region coupled to first voltage terminal and a floating gate***, and ***a MOS capacitor having gate-capacitor electrode coupled to the floating gate of said floating-gate MOS transistor and a substrate-capacitor electrode coupled to a second voltage terminal;***

Group 3, claims 13-15 are drawn to a non-volatile cell structure having first transistor, a second transistor with first S/D coupled to first voltage terminal and second S/D coupled to second S/D of first electrode, ***and a shared capacitor structure providing two capacitors respectively coupled to the gate electrodes of first and***

second transistor,...wherein the first transistor as a first cell and second cell serve together as a dual-cell memory cell;

Group 4, claims 16-17 are drawn to a nonvolatile memory cell comprising a plurality of sub-memory cells grouped as a memory cell, and adapted to a bit line and a word line, ***wherein the cell is programmed using the sub-memory cell one after one, so that it can be programmed multiple times.***

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claim is generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the

case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

2. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Viet Q. Nguyen whose telephone number is (571) 272-1788. The examiner can normally be reached on 7am-6pm (EST).
